Building Access: _____

By existing Driveway: _____ New Driveway: _____

If New Driveway, Curb Cut Required: Yes No

Additional Information: Current Survey is required for permit to be issued showing all buildings, septic, grinder, easements and setbacks.

1. One set of Construction Drawings are required showing sufficient detail for the structure to be constructed.
 - a. Per Section 403 of the 2020 Uniform Residential Code, all freestanding structures over 600 sq. ft. and/or over 10' tall at the eave must meet frost protection requirements.
 - b. All freestanding structures over 600 sq. ft. must be designed by a design professional and bearing their stamp.
 - c. If using trusses, we must have a copy of the stamped truss certificate.
2. Electrical work must be inspected by a certified electrical inspector. This will require both a rough and final inspection.
3. Allowable size of the structure will be directly related to lot sizes. Oversized buildings will require a variance.
4. Setbacks from side and rear yard lot line are 10' and 25' from behind the rear wall of house.
5. The applicant shall call for the required inspections. A final inspection, including a final electrical inspection, is also needed.
