

EXTREME AQUARIUM MAKE-OVER

UNIVERSAL
ROCKS

SO REAL, SO LIGHT, SO EASY

TIPS, HINTS & IMPORTANT NOTES

Create the perfect environment for your vivarium, aquarium or reptile enclosure using the world's most easy to use rock products. Our comprehensive range has been designed to add depth and authenticity to your indoor habitat. Each item is hand-made and hand-colored, giving you a unique piece of rock work for your pets home.

Molded from beautiful natural rock in the USA and Australia, our revolutionary flexible material has delivered a product range that is light weight and easy to install.

Universal Rocks... so authentic you'd swear they were real!

All Universal Rocks™ products are "aquarium and reptile friendly".

All background measurements quoted, are suitable for those tank sizes – backgrounds will vary slightly in length and height. Our products are crafted by hand so all weights and measurements quoted are approximate.

All products are hand-colored therefore variations will occur. Only the Marine products are available in the marine color. Aquarium backgrounds can be cut down to suit smaller tanks by using a sharp rigid blade or some electrical cutting tools. Always use caution when cutting with sharp instruments.

All rocks are hollow and may be cut to allow your fish or reptile places to hide. Please use the appropriate code when ordering "A" for Aquarium, "R" for Reptile and "F" for Foam.

A	A - AQUARIUM	Aquarium rocks can be used in both wet and dry tanks.
R	R - REPTILE	Reptile rocks can ONLY be used in dry tanks – they will float in wet tanks.
F	F - FOAM	Foam rocks can only be used in dry tanks unless siliconed in place (they will float).

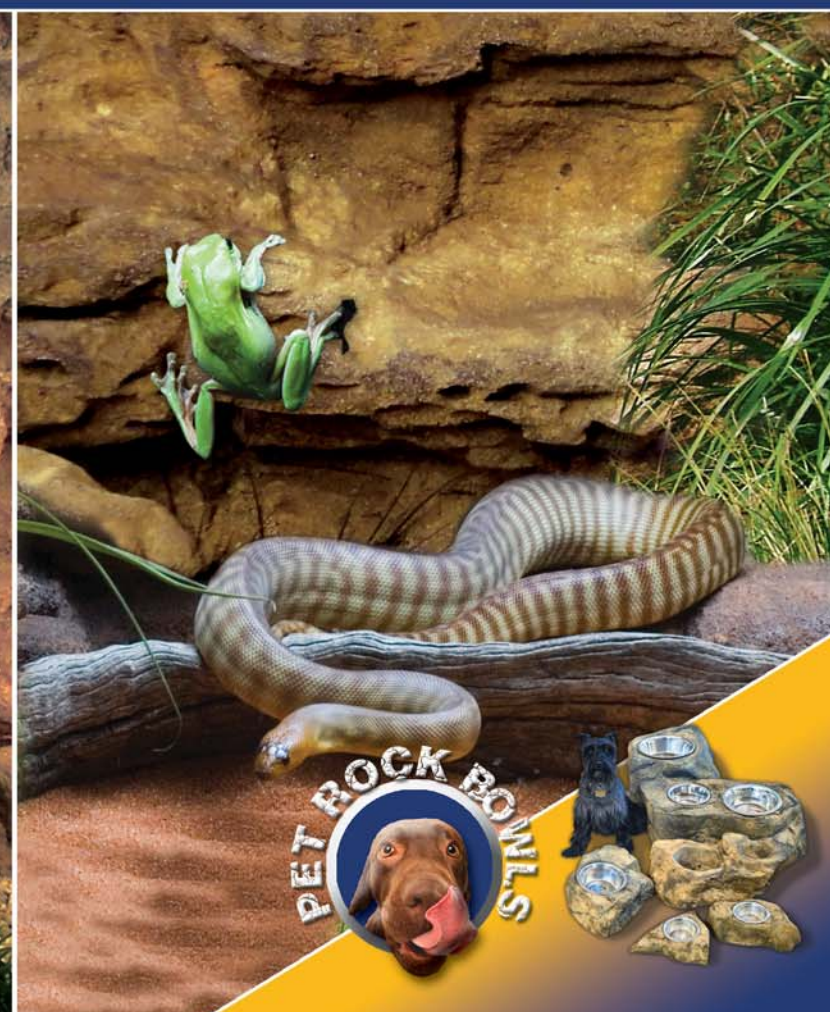

Aquarium backgrounds and rocks can be secured in place with silicone. The edges can be camouflaged by applying crushed rock and colored sands while the silicone is wet. Our products can be washed and scrubbed down with a stiff bristled brush, power washed or bleached. When cleaning the foam products a softer brush is required. We suggest that you wash your new rock or background before installing into your tank.

Most importantly... enjoy creating a natural environment with Universal Rocks.
